Counterfeit Component Policy

Since our inception in 1983 we have always striven to supply our clients with the best quality components at the best price with the quickest delivery time.

However the accidental circulation of counterfeit goods is becoming a very real issue facing independent distributors today and one that we take very seriously.

As well as utilising decades of component inspection experience we will endeavour to reduce the ongoing risk to our clients by :-

- Sourcing if able via Franchised distributors with full traceability
- Purchasing from established trusted sources whenever possible
- Recording batch codes via a unique goods inwards number system
- Visual inspection utilising digital magnification
- Part marking permanence test if required

We will continue to adapt to the challenges that face us and will do that we can to meet the high standards expected by our clients.

To further compliment our services we can offer 3rd party accredited services including component screening, X-ray facilities and de-capsulation.

Yours faithfully

Darren Lacey
Managing Director

Pinewood Electronics Limited
