

Environmental Statement

Pinewood Electronics are a component sourcing company locating customer specific electronic components via our global supplier network.

We actively promote green thinking including :-

- Recycling and re-use of any packaging where possible
- The use of recycled paper products where possible
- Reduction of electricity / gas and water usage
- Correct disposal of any non-recyclable waste
- Reduction of Environmental impact

We actively promote the re-marketing of our clients surplus / redundant stocks which can free valuable space, increase revenue and prevent further landfill.

If this is of interest please visit our Excess Stock area.

Yours faithfully

Darren Lacey
Managing Director

Pinewood Electronics Limited
