

## RoHS Statement

Pinewood Electronics are not a manufacturer of components, we are purely a component sourcing company locating customer specific electronic components via our global supplier network.

On the question of the RoHS status of the components that we sell, our approach is to work closely with our clients and investigate each item individually and offer all supply options including alternative parts or different manufacturers wherever possible.

It should be noted that in the course of our business there may be products that customers require us to source that may have been discontinued for some time and as we are not the manufacturer it may be impossible to guarantee compliance on such items but we will endeavour to offer suitable alternatives.

Please note that we act solely as a distributor of electronic components and that the Buyer is exclusively responsible for detailing the specification of all goods ordered from us and for ascertaining their suitability in their specific application and end product.

We will continue to do what we have done successfully since 1983 which is the source and supply of exactly what our customers want.

Yours faithfully

Darren Lacey  
Managing Director
